**SNAS POLICY FOR ACCREDITATION
OF GREENHOUSE GAS VERIFIERS**

Approved by: **Mgr. Martin Senčák**
Director

Effective from: 31.08.2019	Edition: 1 Updating: 1	Document label: PL-28
--------------------------------------	---	---------------------------------

PURPOSE:

This document determines the SNAS policy for accreditation of greenhouse gas verifiers.

Elaborated by: **Ing. Renáta Kuřková**

Date of elaboration: **06.06.2019**

Verified by: **Ing. Gizela Pelechová**

By coming into force of this PL expired the validity of **PL-28** from 15.08.2016.

Effective from: 31.08.2019	Edition: 1 Updating: 1	Document label: PL-28

1 SNAS POLICY FOR ACCREDITATION OF GREENHOUSE GAS VERIFIERS

1.1 During the accreditation of greenhouse gas verifiers SNAS assesses and confirms the competence of the verifier to perform verification of greenhouse gas emissions according to relevant standards, regulations and normative regulations.

1.2 During the accreditation of greenhouse gas verifiers SNAS assesses the fulfilment of the requirements of the EN ISO 14065 Standard and Commission Implementing Regulation (EU) 2018/2067 (further on only “Regulation”). The verifiers seeking confirmation of competence to perform verification of greenhouse gas emission must meet the requirements of the EN ISO 14065 Standard and Regulation as specified in other relevant standards, regulations, normative regulations, mandatory application documents of international organizations associating accreditation bodies and methodological guidelines for accreditation issued by SNAS.

1.3 Witness assessments are part of the assessment of an applicant for accreditation in this field and they are performed in the form of observation of the greenhouse gas verifier during the performance of verification on the customer’s premises. The condition for granting accreditation is the performance of a minimum of one witness assessment. The number of further witness assessments to be carried out depends on the scope of the requested accreditation.

1.4 After granting accreditation, SNAS performs planned surveillance every year over accredited greenhouse gas verifiers and during the validity of the accreditation certificate it verifies whether the verifier keeps meeting the accreditation requirements concerning their accredited activity

1.5 All principles concerning accreditation given above are also valid for reaccreditation of greenhouse gas verifiers, but for reaccreditation information concerning the accredited verifier gained in the preceding assessments is taken into account.

1.6 An extension of accreditation of a greenhouse gas verifier is performed by SNAS in a similar way as given for accreditation.

1.7 SNAS can also perform extraordinary surveillance over an accredited greenhouse gas verifier on the initiative of SNAS or a third party or the verifier itself.
